

## Christmas lights motif report

The following lights have defects.

### Large star from front of market house.

This motif is part of the display on the front of the market house. Some of the led lights do not work in it. The display consists of 2 of these either side of the main merry Christmas light so I would recommend a like for like replacement for this as it may look a bit odd. Other options are you could purchase a different motif if symmetry is not an issue or 2 new motifs of the same design.

### Proposal

- A. To use the existing light in the condition it is in.
- B. To investigate cost for like for like replacement.
- C. To investigate cost of new light or 2 lights of different style but similar in size.

### Small star on the side of the takeaway opposite market house

This motif has part of its rope light missing, also some of the led lights in its lower point do not work. Would need replacing with something of similar size or leaving out of the display.

### Proposal

- A. To not replace the light and leave it out of the display.
- B. To investigate prices to replace with a light of similar size.

### Festoons

The festoons were new last year so hopefully all is well with those, by next meeting they will be all tested and an update will be given.
